EXPERIENCE

Allstate, Charlotte, NC

Senior Software Engineer

APR 2025 - PRESENT

- Lead production triage and root cause analysis across large-scale Java applications.
- Mentor junior engineers on XP practices, TDD, and cloud-native architecture.
- Design and maintain claims intake systems supporting video and photo workflows.
- Integrate AWS services including S3, EKS, and Rekognition to enhance automation and scalability.
- Improve CI/CD pipelines and testing reliability across distributed systems.
- **Skills:** Java, React, TDD, AWS, Paired Programming, SQL, CI/CD, Bruno, Agile

JPMorganChase, Plano, TX

Software Engineer II

JAN 2024 - APR 2025

- Led a team of five engineers, driving system design and architectural decisions.
- Designed and implemented event-driven workflows using AWS Step Functions, Lambda, S3, and RDS.
- Developed high-performance Java microservices aggregating data from multiple internal systems.
- Introduced AWS tagging standards to improve cost transparency and optimization.
- Partnered cross-functionally with Payment Technology teams to deliver scalable solutions.
- Delivered engineering talks focused on stability, efficiency, and cost optimization.
- Mentored engineers on career growth, technical design, and cloud best practices.
- Contributed to firm-wide initiatives including Code for Good
- **Skills:** Java, TypeScript, Terraform, NodeJS, Jest, Cucumber, AWS, pSQL, CI/CD, Postman, Agile

Revature, Plano, TX

SEP 2022 - DEC 2023

Software Engineer Consultant @ JPMorganChase

- Built RESTful APIs and cloud-native services using Java and AWS.
- Implemented infrastructure as code using Terraform across multiple AWS accounts.
- Developed CI/CD solutions for monorepo deployments using Spinnaker.
- Automated DevOps workflows, reducing manual deployment overhead.
- Participated in full SDLC lifecycle from architecture to lower-environment testing.
- Delivered cross-team implementations that reduced operational costs.
- **Skills:** Java, TypeScript, Python, Terraform, NodeJS, Jest, Cucumber, AWS, pSQL, CI/CD, Postman, Agile

Ardagh Group, Winston-Salem, NC

DEC 2018 - AUG 2022

Backend Maintainer

- Analyze/Update procedural manuals for manufacturer/engineering guides.
- Test/Measure product from equipment to ensure quality specifications.

CERTIFICATES

AWS Cloud Developer Associate - `dda2927e793243f692e1da4a4f3b3df9`

AWS Cloud Practitioner - `M7CDTZBLP2B11JGT`

EDUCATION

Woodland Christian School, Winston-Salem, NC - High School Diploma

2009 - 2013
